Subject: MICROSOFT SETTLEMENT

I am a Microsoft Windows user and have had no problems using other software. I was not in favor of the Microsoft litigation and now that there is an agreement with nine states and the Federal Govt. I can see no good reason to have other selfish interest groups drag this issue on into the future. Surely it won't help the best interests of the American public to drag this on in these times of economic uncertainty, especially if it serves the interests of a few States wherein Microsoft's competitors reside.

Please take action to end this issue immediately.

Frank Rouse
